Frontend Developer | Full Stack Engineer

Frontend-focused Full Stack Developer with 2+ years of experience building responsive, accessible, and scalable web applications using React (TypeScript), Redux Toolkit, Django, and PostgreSQL.

Strong foundation in frontend architecture, state management, accessibility, and API-driven systems with a focus on performance, usability, and maintainable code.

Combines technical expertise with strong communication and cross-functional collaboration skills developed through leadership and client-facing experience.

Technical Skills

Frontend: JavaScript (ES6+), TypeScript, React, Redux Toolkit, Vue.js, HTML5, CSS3, jQuery, Bootstrap, Responsive & Cross-Browser Design

UI/UX & Accessibility: Figma, Adobe XD, Pixel-Perfect Layouts, User-Centered Design, WCAG 2.1 / Section 508 Compliance

Performance & Debugging: Browser Console & Network Debugging, API Optimization, Data Structures & Algorithmic Problem-Solving, Lighthouse & Core Web Vitals Analysis

Backend & APIs: Python (Flask, Django), RESTful API Development & Integration, Authentication & Data Flow

Databases: SQL, PostgreSQL, MongoDB

DevOps & Tools: Git, GitHub, AWS, Docker, CI/CD (GitHub Actions), Vercel, Netlify, Postman, Jira

Projects

KFursenko Candles | Full-Stack E-Commerce | [GitHub](#)

React (TypeScript), Redux Toolkit, Python (Django), PostgreSQL, WCAG 2.1

Built a full-stack candle e-commerce platform featuring AI-powered search, a scent recommendation quiz, and an integrated AI Sales Assistant for personalized product discovery. Developed scalable APIs, secure checkout flows, dynamic filtering, and WCAG 2.1 / Section 508-compliant interfaces optimized for accessibility and performance.

TRESSE Online Store | Full-Stack E-Commerce | [GitHub](#)

React (TypeScript), Redux Toolkit, Python (Django), PostgreSQL, WCAG 2.1

Built a responsive online store with secure checkout, order APIs, and accessible UI compliant with WCAG 2.1 standards.

Real-Time Chat App | WebSocket Communication | [GitHub](#)

React (TypeScript), Flask-SocketIO, REST API

Developed a live chat system with multi-user support, event-driven updates, and low-latency WebSocket messaging.

Pokémon Adventure | API Integration & Data Visualization | [GitHub](#)

Built an interactive Pokémon web application powered by PokéAPI, featuring dynamic data rendering, battle simulation, character statistics, and evolutionary data visualization.

Experience

Full Stack Developer (Freelance – KFursenko) | Washington, DC | Jan 2026 – Mar 2026

Designed and developed a consumer-facing candle e-commerce platform focused on AI-powered product discovery, accessibility-first architecture, and high-performance frontend engineering.

- Architected a modular React (TypeScript) component library with branded micro-interactions and mobile-first responsive layouts using Redux Toolkit for state management.
- Built and integrated an AI Sales Assistant (LLM API) enabling mood-based scent recommendations, AI-powered search, and real-time customer Q&A within the shopping flow.

- Achieved 96/100 Lighthouse Accessibility and 98/100 Performance scores; full WCAG 2.1 AA & Section 508 compliance via semantic HTML, ARIA landmarks, and AA-contrast system.
- Delivered sub-1.5s page load through lazy loading, code splitting, and image optimization.

Full Stack Developer (Freelance – TRESSE Project) | Washington, DC | Oct 2025 – Jan 2026

Designed and developed a full-stack e-commerce platform for a knitwear brand using React (TypeScript), Redux Toolkit, Django, and PostgreSQL.

- Architect modular frontend with reusable components, real-time REST APIs, and WebSocket data sync.
- Integrate Stripe, SendGrid, AWS S3, and JWT authentication for secure transactions and user flows.
- Optimize UX and automate workflows, boost order completion 70% → 95% and reducing cart abandonment 40% → 10%.
- Deliver WCAG 2.1-compliant, responsive UI and maintain high performance through CI/CD (Docker, GitHub Actions).
- Implement testing with Jest and Postman and monitor API logs to sustain 99.9% uptime.

Software Developer Intern | Co.Lab | Washington, DC | 2024

- Built modular frontend architecture using React, Redux Toolkit, TypeScript, and Axios.
- Collaborated cross-functionally with designers, PMs, and backend engineers to deliver sprint goals.
- Implemented CI/CD pipelines with GitHub Actions and applied version control best practices using Git.
- Automated testing with Jest and Postman, reducing pre-release bugs by 30% and improving sprint velocity.

Database Administrator | Rosgosstrakh (Medical/Life Insurance) | Ufa, Russia | 2015 – 2019

- Administered and optimized high-performance Oracle databases supporting critical insurance operations.
- Automated repetitive tasks using PL/SQL scripts, reducing incident resolution time by 50%.
- Implemented data security, backup/recovery strategies, and monitoring tools to maintain 99.9% uptime.
- Collaborated with cross-functional teams to integrate internal systems and streamline reporting processes.
- Trained and supported 100+ end users, improving system adoption and operational efficiency.

Other Experience

Relocated from Russia to the U.S. in 2019, transitioning from database administration to customer-facing leadership roles while continuing to develop technical expertise.

Administrative & Leadership Roles | Brooklyn, NY | Washington, DC | 2019 – Mar 2026

- Held client-facing and supervisory positions in dental, retail, and hospitality sectors after relocating to the U.S.
- Led and coached staff, driving service excellence and resolving **95% of customer issues** on first contact.
- Introduced workflow improvements that enhanced scheduling and communication efficiency.
- Earned recognition for adaptability, professionalism, and commitment to high-quality service—skills later applied to Agile, team-based software development environments.

Education & Certificates

M.S. in Accounting and Finance

Novosibirsk State University of Economics and Management (NSUEM) | Novosibirsk, Russia | 2018

B.S. in Social Security Law and Accounting & Finance (Double Major)

Ufa College of Statistics, Informatics and Computer Engineering | Ufa, Russia | 2015

- **Full stack Software Engineer Program** | Coding Temple
